Subject: Set GridCtrl read only when editing

Hello all

I wanted to set a GridCtrl as read only when cursor is editing in a cell.

Now in that state, doing

grid.Inserting(w).Appending(w).Removing(w).Editing(w).Duplicating(w);

does not affect the grid until the cell loose the focus.

So if I do not click outside the cell, I can follow editing although the grid is read only.

Hello all

I have found CancelEdit().

It serves well although rejects the changes in last edited cell with cursor selected inside.
