Hello all

dolik.rce and me are glad to show you new svn pages in Web

Now you can see in index page (<http://www.ultimatepp.org/index.html>) the latest svn revision and a link to svn pages that are here ([http://www.ultimatepp.org/svn\\$suppweb\\$svn\\$en-us.html](http://www.ultimatepp.org/svn$suppweb$svn$en-us.html)).

There you can access svn logs for all and major releases. There also filters for only U++, Bazaar and Web.

The first dolik.rce idea was to do a dynamic filtering. However compatibility problems forced to do html pages.

Proposals are welcome!

I quite like it.

(BTW, I think releases under roadmap should have dates, so anyone checking the roadmap can get idea of the progress in time. At least for new entries.)

Could you detail a little bit more your proposal

I don't think this can be much more detailed I will fetch the dates of releases from forum announcements and write them in the Roadmap page. From now on, we should just make sure that we write there a date when we create new release.

Honza

PS: Done and committed. By the way, release 1952 was announced in the forum, but was missing on the roadmap page. I resurrected the text from older revision and put it back.

Thank you Mirek.

Your support is encouraging.

All of this requires rather time and many times things are not so simple as they could seem . So this kind of answers give us support.

You tell me that

I am really happy with all the work you do. Website quickly converges to something much better, which was always well beyond my capacity...
