Subject: REQUEST: Find/replace dialogs

Hello,

After pressing Replace-button, "Find and replace" dialog switches to "Find" dialog. Replacing the string in many parts of code is too hard.

If such behavior is just a feature, it's the bad feature. How to return old dialogs?

Best regards,
Anton

P.S. "Find and replace in files" - not helps me.

I mark all file (Ctrl+A) in which I going to replace text and than press Ctrl+H. In this case all work fine.

But it's temporary decision.

Not a feature, a bug. Fixed.

Sorry I have missed this one so far; I am mostly using replace in block...
