The following patch solves the compilation issues with MSC10 compiler:

uppsrc\Core\Core.h(299): #if !defined(STLPORT) -> #if !defined(STLPORT) && _MSC_VER < 1600
uppsrc\Web\socket.h(132): #define SOCKERR(x) COMBINE(WSA, x) -> #define SOCKERR(x) WSA##x

P.S. Additional warnings takes place:

Linking...
LINK : warning LNK4224: /INCREMENTAL:YES is no longer supported; ignored

Regards,
Grigory

Thanks, source file changes applied; I will wait to fix linker warning until MSC10 is official.

MSC10 is already official. You can download it with Visual Studio 2010 Express (only x86 compiler is available):
Visual Studio 2010 Express download page link

Grigory.

Thanks Grigory.

And there is also an Express version for Phone here: http://www.microsoft.com/express/phone/

Hello all

TheIDE compiles well with Visual Studio 2010.

Some details:

- After installing, when running Visual Studio you will see a splash screen telling "For Evaluation Purposes Only". Do not care. After registering this message disappears and in fact the Express version license permits commercial programs as you can see here:
http://blogs.msdn.com/webdevtools/archive/2010/04/12/visual-web-developer-2010-express-has-arrived.aspx

- Express version for Phone only runs in Vista and Seven.

Does it include C++ compiler?

Mirek

Hello Mirek

I do not know. I do not have Vista or Seven.
