Hello all,

I need to convert charsset from EE8ISO8859P2 to Unicode.

I tried to convert from CHARSET_ISO8859_2 but it is not what I need.
Here is a screenshot. in red is the correct text.

The default charset is UT8 (255).

For conversion I used:
   String v_last_name(curr_st[SqlId("LAST_NAME")]);
   WString v_last_name_w(ToUnicode(v_last_name, CHARSET_ISO8859_2));

Can anibody to help me?

I found this interesting conversion to unicode!

I resolved the problems! it was NLS_LANG to Oracle client. I have not instaled Oracle client. for this I need to set charset default.
