What is new in version 2467:

Core

- * [W]String got new variant of ReverseFind method.

CtrlCore

- * There is a new static method Ctrl::GetEventId to help identify individual GUI events, intended for use in caching schemes.

CtrlLib

- * Update system was parametrised.
- * Handling of active file type in FileSel was improved.
- * Splitter now has WhenSplitFinish.

PdfDraw

- * Got support for fill patterns.

TheIDE

- * Now has QTF designer.

Bazaar

- * SysInfo: Added CPU temperature monitoring and improved battery status.
- * Functions4U: Added new SVG color functions and doc.
- * Controls4U: Added ActiveX controls (VLC and web browsing).
- * MtAlt: Added support for fast 5-argument callbacks (copy and pick version).
- * Form: Form core package, Editor and sample.
- * Scatter: Added SetSequentialX and SetFastViewX for faster refresh.
- * Docking: Bug fixes, some small feature additions.
- * ExpandFrame/ExpanderCtrl: Fixes for horizontal alignment.
- * AESStream: Added SHA2 functions.

Download it in <http://code.google.com/p/upp-mirror/downloads/list>

Hello,

I compiled it under Mandriva using "make" and "make install". Theide was compiled but then I got

the error message "invalid memory access".

What is it? What am I missing?

Luigi

Hello,

false alarm. I have upgraded my Mandriva 2008 to 2010 and everything went OK.
The new KDE4 looks much better than windows and I was not aware of it.
The latest Upp looks great even under linux (I was on the 2008 version). Fantastic work!

Thank you,
Luigi
