Hi,  
please. how to add some types to Values?

I mean expecially: char and short, recognized also by .GetType()

Thanks a lot.

Thanks a lot.

[http://www.ultimatepp.org/reference\\$Value\\$en-us.html](http://www.ultimatepp.org/reference$Value$en-us.html)

I see little point in adding char or short. What is the advantage over using int?

Mirek
