Subject: [SQLITE] Enable FTS in compiler options by default

It would be nice to enable FTS (full-text search) in SQLITE by default.

The only change, which is required, is changing compiler options to "-DSQLITE_ENABLE_FTS4 -DSQLITE_ENABLE_FTS3_PARENTHESIS".

That shouldn't increase size of executable significantly.

TIA

Hm, I suggest to wait some months to make 3.7.0 settled, then update the package...

This is not related to 3.7.0 FTS3 is a part of SQLITE for four years. (A copyright notice in source files refers to 2006 Oct 10)

It is like it was there forever.
