
Subject: HttpClient problems?

I have this simple program:

```
#include <Core/Core.h>
#include <Web/SSL/WebSSL.h>
using namespace Upp;

CONSOLE_APP_MAIN
{
    HttpClient c;
    c.Trace();
    c.URL("https://www.pcisecuritystandards.org/");
    SaveFile("hello.txt", c.ExecuteRedirect());
}
```

When I run it, the console prints:

Heap leaks detected!

and hello.txt is 0 bytes.

Any thoughts on why this would be? I am on Linux (debian based, CrunchBang Linux --- made for netbooks).

Thanks,

Jeremy

Hello Jeremy,

I think your problems are related to WebSSL, see this thread for more infos.

Andrei
