Hi,

Is it possible to change the bgcolor of a menu bar? I guess this might make applications more attractive from the visual point of view.

Cheers,

Javier

Any suggestion? Is not visual attractiveness important?

Javier

Hi Javier,

Update: That will do the job  
`MenuBar::Style& s = MenuBar::StyleDefault().Write();`  
`s.look = Red();` // Could be Color, Image, Your own value if you handle it (see Chameleon example)

Using ChStyle structure of each control you may alter it's look.

Andrei
