I didn't find any portable Delay(msec) or Sleep(msec) or something like it in core... Am I wrong ?
If not, it would be an handy addition, as Sleep is just for windows, Linux has usleep but with microseconds and other platforms I don't know.

Ciao

Max

How about

```
void Sleep(int msec)
```

from Core?

Ahhhhhh !

I really missed that one !

Thank you !

Max
