Hi,

I am interested in knowing whether the ctrl in question does exist. If it does, how does it work (please provide some hints)?

I find very attractive the combination of ArryCtrl + dropdown feature.

Thank you,

Javier

does not show the drop-down feature at all. And, IMO, it is in the drop down+arrayctrl feature where the attractiveness of this control resides, is it not?

So, any precise hint?

Thank you,

Javier

My use (no visual editor)

.h

```
FrameRight<Button>  buildmethod;
PopUpTable          methodlist;
EditString          technik;
```

.cpp

```
technik.AddFrame(buildmethod);
  buildmethod.SetMonoImage(CtrlImg::SmallDown()).NoWantFocus() ;
buildmethod.WhenPush = THISBACK(DropMethodList);
methodlist.Normal();
methodlist.AddColumn();
methodlist.Grid();
methodlist.WhenSelect = THISBACK(SelectMethod);

.....

void DropMethodList(){methodlist.PopUp(&technik);}
void SelectMethod(){if(methodlist.IsCursor()) technik <<= methodlist.Get(1);}

.....

while(sql2.Fetch())
    methodlist.Add(sql2[2],Value(Format("%s , %s",sql2[0],sql2[1])));
......
```

and it's run.
