Subject: Alternate "Copy as declaration/definition"
Posted by cbpporter on Mon, 06 Sep 2010 10:41:09 GMT

I'm posting here as a reminder for myself when I have time to add an option to "Copy as declaration/definition" somewhere in Environment settings so it puts the "{" on the same line.

I use this option a lot, and after a few hundred manual changes to the curly bracket position, I am getting sick and tired of it .

That would be great, it happens to me a lot too In ideal case it should honor Bracket format (attach/break) from Setup > Environment > Code formatting.

Honza
