
Subject: [FEATURE] Horizontal scroll on Shift+mouse wheel

Hi everyone!

I have a little proposal. It is pretty standard behavior, at least on Linux, that mouse wheel scrolls the window horizontally when holding the shift key. I am quite used to this so I often use this scrolling, especially in the code editor (I have really small screen...), just to find out over and over again that it doesn't work

I would be very happy, if `LineEdit::MouseWheel()` could be changed to allow this behaviour. The code: `void LineEdit::MouseWheel(Point, int zdelta, dword keyflags) {`

```
if(keyflags&K_SHIFT)
    sb.WheelX(zdelta);
else
    sb.WheelY(zdelta);
}
```

Thank you,
Honza
