Hi,
I want to add a frame to the right side of the menu bar of my application.
I try using Frame and ImageCtrl but the image background was black.

```
...
MenuBar          gMenuBar;
//
FrameRight<ImageCtrl>  gMric;
//
...

App::App() {
...
AddFrame(gMenuBar);
AddFrame(TopSeparatorFrame());
//
gMenuBar.AddFrame(gMric);
//gMric.Transparent(true);
gMric.TransparentBackPaint();
gMric.SetImage(GenIcons::Download_1_16_2D());
...
}
```

Please, any Idea for add an icons to the right side of the menu bar ??

Thanks.

Solved! I saw how working the "display" object in the IDE menu bar, and I also understand that "Label" objects are able to show images, so I use this way.

Well, if one day U++ will come with complete documentations, it will be a good tool also for unexpert C++ developers.

Thanks.
