Hello Mirek

Now StreamRasterEncoder::SaveFile() function permits to save a null Image. This produces a "Memory leaks" error as function initial\_setup in jcmaster.c, if detects that width or height is zero, does an exit().

I hope this fixes it:

```
void StreamRasterEncoder::Save(Stream& s, Raster& raster)
{
    if(raster.GetWidth() == 0 || raster.GetHeight() == 0)
        return;
```
