
Subject: TreeCtrl - how to change images dynamically? [SOLVED + FIXED]

in TreeCtrl

There are methods:

```
void Set(int id, Value value);  
void Set(int id, Value key, Value value);
```

but no for images...

How to change images dynamically?

(other than add or insert!!!)

void Set(int id, Value key, Value value);
```

but no for images...

How to change images dynamically?

(other than add or insert!!!)

I haven't done a lot of thinking but this works for me:

```
void TreeCtrl::Set(int id, const Image& img)  
{  
    Item& m = item[id];  
    // if(m.ctrl) { //Edit: in fact this doesn't work ?  
        m.image = img;  
        RefreshItem(id);  
    }  
}
```

If there is no other way, maybe it would be good to have added something like above?

Also, question arises, how to add a series of images?

```
const Node& GetNode(int id) const;  
void      SetNode(int id, const Node& n);
```

What do you mean by "series of images"?

Mirek

void      SetNode(int id, const Node& n);
```

What do you mean by "series of images"?

Mirek

I had tried this unsuccessfully... That's why I asked.

```
tree.SetNode(editid, tree.GetNode(editid).SetImage(CtrlImg::ImgEdit()));
```

E:\AriUppApps1\ideAris1\main.cpp(26) : error C2662: 'TreeCtrl::Node::SetImage' : cannot convert
'this' pointer from
'const TreeCtrl::Node' to 'TreeCtrl::Node &'

I had tried this unsuccessfully... That's why I asked.

```
tree.SetNode(editid, tree.GetNode(editid).SetImage(CtrlImg::ImgEdit()));
```

E:\AriUppApps1\ideAris1\main.cpp(26) : error C2662: 'TreeCtrl::Node::SetImage' : cannot convert
'this' pointer from
'const TreeCtrl::Node' to 'TreeCtrl::Node &'

Ah... Well, one of rare cases when C++ does not play well...

Try

```
TreeCtrl::Node n = tree.GetNode(editid);  
n.SetImage(CtrlImg::ImgEdit());  
tree.SetNode(editid, n);
```

Thinking about it, it would probably be better here to return Node value instead of constant
reference... what do you think? (Constant reference is faster, however in this case it is very likely
you are about to change the value in most cases).

Mirek

It works this morning... I can't believe it didn't work yesterday ... Something magic. Maybe I was too tired and did a typo mistake once again somewhere. And I knew about that const... Anyway, thank you very much for confirming it because I was going mad and suspected bugs everywhere...

And I couldn't understand the reason of not returning Node... but I have not much against const if it works...

Well, I have changed it to return value instead of reference... so no more confusion there
