Hi all,

I am not sure that this topic is posted in the right forum but I am looking for U++ users having experienced pIPlot or similar libraries for including statistical graphics (Barx,xyplot and pie) in U++ applications.

Thanks in advance for reply

regards
Biobytes

Hello BioBytes

Far from PIPlot features, you have in Bazaar Scatter package for 2D plots.

Thanks Koldo for your reply.

I think the Bazaar Scatter package is what I was seeking for. Definitely U++ is a wonderful tool.

Thanks again for your support

Kind regards
Biobytes
