Hi, updating from svn, I got this :

```
void Ctrl::DoPaint(const Vector<Rect>& invalid)
{
    GuiLock __;
    if(IsVisible()) {
        LTIMING("DoPaint");
        fullrefresh = false;
        // if(GLX) return;
        GC gc = XCreateGC(Xdisplay, (Drawable)top->window, 0, 0);
        XftDraw *xftdraw = XftDrawCreate(Xdisplay, (Drawable) top->window,
                                         DefaultVisual(Xdisplay, Xscreenno), Xcolormap);
        SystemDraw draw(top->window, gc, xftdraw, invalid);
        Painting = true;      <--HERE
        UpdateArea(draw, draw.GetClip());
        Painting = false;     <--HERE
        XftDrawDestroy(xftdraw);
        XFreeGC(Xdisplay, gc);
    }
}
```

The lines with 'Painting=.....' gives compilation error.
I guess that 'Painting' should be 'painting' instead.

Ciao

Max

Yep, is fixed... I'll mark it in topic title

Ciao

Max
