I downloaded UPP from sf.net for win32. and install it. the install wizzard can detect vs2008's environment(my pc have installed vs2008).
and then I open the smaple "addressbook" project, but it can not pass the building by thelde?

anybody can help me ?

the errors just like below:

```
E:\Research\GUI\UPP\uppsrc\Core/Core.t(22) : error C2001: newline in constant  
E:\Research\GUI\UPP\uppsrc\Core/Core.t(42) : error C2001: newline in constant  
E:\Research\GUI\UPP\uppsrc\Core/Core.t(43) : error C2001: newline in constant  
E:\Research\GUI\UPP\uppsrc\Core/Core.t(78) : error C2001: newline in constant  
E:\Research\GUI\UPP\uppsrc\Core/Core.t(79) : error C2001: newline in constant  
E:\Research\GUI\UPP\uppsrc\Core/Core.t(96) : error C2001: newline in constant  
E:\Research\GUI\UPP\uppsrc\Core/Core.t(97) : error C2001: newline in constant  
E:\Research\GUI\UPP\uppsrc\Core/Core.t(114) : error C2001: newline in constant
```

I checked the Core.t file, seems it have east Asian language in the code.
how to deal with it?

I just convert core.t and richedit.t encoding from UTF-8 to default, the ide can be pass the building with MSVC9.
