I used UPP in windows, and just build the "addressbookxml2" samples use MSVC9 with optimize, it have 1.3M. So big.
now I wanna to seperate the UPP to dll, so all of my applications can be as below:
1.exe, 2.exe,3.exe upp.dll.

1 and 2, 3, will share the upp.dll.

how to do that?
