Hello all

It seems I have a problem in the ffmpeg library I am using, as I get a memory leak just after GUI_APP_MAIN {.

Question: Is it possible to void the memory leaks before the program begins?

Not yet. So far it is possible to suppress leak reporting for certain allocations, however you have to have opportunity to switch it on/off:

```
MemoryIgnoreLeaksBegin()  
MemoryIgnoreLeaksEnd()
```

```
struct MemoryIgnoreLeaksBlock {  
    MemoryIgnoreLeaksBlock() { MemoryIgnoreLeaksBegin(); }  
    ~MemoryIgnoreLeaksBlock() { MemoryIgnoreLeaksEnd(); }  
};
```

Thank you Mirek.

I will try it.
