UNIQUE_LIST has a typo and INDEX_LIST is missing (plugin/sqlite3/Sqlite3Schema.h)

```
#define UNIQUE_LIST(u, l)      ATTRIBUTE("create unique index UQ_@t$" #u " on @t "\
                                "(" l ");",\
                                "drop index UQ_@t$" #u ";")
#define INDEX_LIST(u, l)      ATTRIBUTE("create index IDXL_@t$" #u " on @t "\
                                "(" l ");",\
                                "drop index IDXL_@t$" #u ";")
```

and a lot of #undefs are missing.
