Visual Studio 2010 (only C++ installed) installed.
1.no directories recognized in auto-setup when first installing U++ 2754.
2.VC10 part has no "browse" buttons.

I entered "c:\Program Files\Microsoft SDKs\Windows\v7.0A\" and "d:\Program Files\Microsoft Visual Studio 10.0\VC\" in the two boxes and the result is similar to the settings worked for me before as shown in http://www.ultimatepp.org/forum/index.php?t=msg&goto=15202&&srch=visual#msg_15202

Hello Bonami

Quote:2.VC10 part has no "browse" buttons.
What do you mean?. Include screenshots.

Hello Bonami

In my case I use VS2010 and it works well.

This is the screen from an XP SP3, TheIDE compiled with VS2010.

For browse buttons to appear the following lines have to be added in ide/AutoSetup.cpp @ 145

DirSel(dlg.visualcpp10, bd.Add());

DirSel(dlg.sdk10, bd.Add());

Detection code for VS2010 seems correct but i don't have VS2010 installed to test that.

Hello Bonami,

I've installed VSEE2010 and hopefully fixed autosec. I've committed a patch and the result should be visible in next ide release, tomorrow. If you can't wait until then you may build it from svn.

I've also committed a fix for TDM-MINGW auto-setup.

In this case, why not to create a ArrayCtrl and put all MSC in the table? It saves the form space and clarify the auto-setup algorithm.

Hello Ion,

In my opinion auto-setup as it is should be removed, there should be an option in "Build methods" dialog which should create a build method for every compiler found, nothing more.

Andrei
