I wonder if any of you has seen this app. Superb physics rendition.

http://souptoys.com/pressroom.php

How difficult to implement is something like this? Any pointers? I'm just curious to learn

Hello Jerson

Recently unodgs has uploaded a 2D physics package.

With it and some effort you could get something similar.

@Koldo
I've seen the physics package in Upp.

@mrjt
Box2d has some docs that I'd read up. Thanks

Recently I added Box2D package to upp. There is also Box2DExample that shows how to integrate it with upp draw system.
