
Subject: Can't browse filesystem in TheIDE

Hi,

after updating both Windows (to Windows 7) and U++ (to the latest stable version) I can't browse my filesystem, which pops up when I try to add a file to a package. Clicking on e.g. the C-drive shows a popup 'Unable to read directory'. I'm already running TheIDE under administrator rights and compiling and running an example application works without problem.

Anybody any idea how to fix this?

Best regards,

Martin

Deinstallation and reinstallation seems to work...

Anyway it works again.
