Subject: Scintilla for U++ and other languages
Posted by Rishi on Sun, 31 Oct 2010 06:07:51 GMT

Can anyone port Scintilla to the U++ toolkit?
It will help in other programming languages like the Perl, etc.
What about bringing other languages compatibility... (like stupid ECLIPSE but U++ will be surely better)?
Like HTML, PHP, etc? I can write a portable minimal PHP + apache web server for windows.
Can we start in the simplest like BASIC/ASM?
