Is there a method to center de top most window?

Thank you.

JoseB

The window get centred if x, y parameters of SetRect are 0.

// Example:
win.SetRect(0, 0, 640, 480); // or in constructor

in constructor I made this:

Rect r=GetRect();
SetRect(0, 0, r.right - r.left, r.bottom - r.top);

and the window is shown in the 0,0 coordinates. I want to center it in the screen

JoseB wrote on Thu, 02 December 2010 15:32in constructor I made this:

Rect r=GetRect();
SetRect(0, 0, r.right - r.left, r.bottom - r.top);

and the window is shown in the 0,0 coordinates. I want to center it in the screen

JoseB

CenterScreen(); after SetRect(..) would do that.

Ok...
I cant do that in constructor.
I have to create a now method called wjen the windows already exists...

Thank you

Jose B

Hello JoseB

By default TopWindow is centered the first time it is opened, so it is not necessary to re-center it in constructor.

Could you give more details?.
