Subject: printing RichEditWithToolBar rotated 90 degrees?

Hi!
I am using RichEditWithToolBar in order to print envelops. I write the addresses (source and destination) on the RichEditWithToolBar sheet but now I need to print it rotated 90 degrees as envelops enter in printer in portrait mode.

Is this possible?

Thanks a lot

Alex

With U++ version you have, you would need to implement your own Print.

Anaway, I have just added "automatic landscape" into Print routing for RichText. With it, all you need to do is reverse page dimensions:

```
RichEdit editor;
editor.SetPage(Size(6074, 3968));
```

Should be available tomorrow on googlecode...

Thanks!
Any tips for guidng me making it "by hand", I mean making my own rotated printing.

Alex

Follow the trail of Print button, replicate the code, insert Landscape at some point.

Or safe the effort and use actual version of U++

Please do you confirm that the

upp-win32-2884.exe (installer for windows)

in the Nightly builds has the landscape option?

Is it the 2884 version?

Thanks a lot

Well, likely not - it looks like automated release system has failed..

Investigating.
