Subject: How to add a three state button in an ArrayCtrl

Hello,

with the line

```
arr.AddColumn("Avail" "Avail?", 4).Ctrls<Option>();
```

I've a nice TWO state option button in a column of the arrayctrl. But I would like a THREE state option button.

I guess I must use - ThreeState(true) - somewhere.

I have put it in all position in the previous line, for example:

```
arr.AddColumn("Avail" "Avail?", 4).Ctrls<Option>().ThreeState(true);
```

but with no success. Any idea?

Thanks

Luigi

One piece is this:

```
void Avail3(One<Ctrl>& ctrl)
{
    ctrl.Create<Option>().ThreeState();
}
```

The second piece something like this:

```
arr.AddColumn("Avail").Ctrls(Avail3);
```

try and tell if it works...

YES! It works. Some day I'll understand why your way works and my not.

Luigi

Luigi

By the way, the correct code line is:

```
arr.AddColumn("Avail", "Avail?", 4).Ctrls(Avail3);
```

With one argument in AddColumn() that button does not appear.

Thanks
