

Please, could you help me compiling this little example app:

```
#include <CtrlLib/CtrlLib.h>
#include <winpool.h>
using namespace Upp;

struct MyAppWindow : TopWindow
{
    virtual void Paint(Draw& w)
    {
        w.DrawRect(GetSize(), SWhite);
        w.DrawText(20, 20, "Hello world!", Arial(30), Magenta);
    }

    MyAppWindow()
    {
        Title("My application").Zoomable().Sizeable();

        char szPrinterName[255];
        unsigned long lPrinterNameLentgth;

        int ret=GetDefaultPrinter(szPrinterName,&lPrinterNameLentgth );
        if(ret==0)
        {
            DWORD dwErr = ::GetLastError();
            char e[100];
            sprintf(e,"%d",dwErr);

            MessageBox(NULL, "GetDefaultPrinter Error", e,MB_ICONINFORMATION);
        }
    }
};

GUI_APP_MAIN
{
    MyAppWindow app;
    app.SetRect(0, 0, 200, 100);
    app.Run();
}
```

The compiler says:

C:\upp\MyApps\ppp\main.cpp: In constructor 'MyAppWindow::MyAppWindow()':

C:\upp\MyApps\ppp\main.cpp:21: error: 'GetDefaultPrinterA' was not declared in this scope

C:\upp\MyApps\ppp\main.cpp:29: error: returning a value from a constructor

This is just a test application.

Thank you

JoseB

Hello JoseB

Just add winspool library.

So:

- Select your package
- Do right click or select menu Project
- Choose Package Organizer
- In right side blank area do right click
- Choose New Libraries...
- Fill WIN32 in the left field and winspool in right field
- Push Ok
- Push Ok

Thats all. Here there is a screenshot:

Ok. Thank you  
(I thought it was a compiler error and not a linking error)

JoseB

Hello JoseB

Yes you are right. You got that message from the compiler (MinGW) before adding the line:  
`#include <winpool.h>`  
Including winpool as include and lib solves it all .

I am still getting the same error even after adding the include and the lib references

Sorry, I only got a linking error that was fixed by adding the library.

Could you post more details about your U++ version and Windows version?

---

I tried the [kk.7z](#) and the error still exists.  
I am compiling in windows 7 and upp 2901

Please, could you create a little program from the ground upp console or dialog to try it in my environment?

Thanks

JoseB

Hello JoseB

What is the compiler output?

Here it is:

```
----- CtrlLib ( GUI GCC DEBUG DEBUG_FULL BLITZ WIN32 ) ( 1 / 9)
----- CtrlCore ( GUI GCC DEBUG DEBUG_FULL BLITZ WIN32 ) ( 2 / 9)
----- Draw ( GUI GCC DEBUG DEBUG_FULL BLITZ WIN32 ) ( 3 / 9)
----- plugin/bmp ( GUI GCC DEBUG DEBUG_FULL BLITZ WIN32 ) ( 4 / 9)
----- RichText ( GUI GCC DEBUG DEBUG_FULL BLITZ WIN32 ) ( 5 / 9)
----- Core ( GUI GCC DEBUG DEBUG_FULL BLITZ WIN32 ) ( 6 / 9)
----- plugin/z ( GUI GCC DEBUG DEBUG_FULL BLITZ WIN32 ) ( 7 / 9)
----- plugin/png ( GUI GCC DEBUG DEBUG_FULL BLITZ WIN32 ) ( 8 / 9)
----- kk ( GUI MAIN GCC DEBUG DEBUG_FULL BLITZ WIN32 ) ( 9 / 9)
main.cpp
C:\upp\MyApps\kk\main.cpp: In constructor 'MyAppWindow::MyAppWindow()':
C:\upp\MyApps\kk\main.cpp:21: error: 'GetDefaultPrinterA' was not declared in this scope
kk: 1 file(s) built in (0:04.06), 4065 msec / file, duration = 4125 msec, parallelization 0%
```

There were errors. (0:04.90)

Hello JoseB

Find file "winspool.h" and #include it in source.

Do you means include it physically? Make a copy of it or just use the include directive?

I have this already and the error still exists:

```
#include <CtrlLib/CtrlLib.h>
#include <winspool.h>
using namespace Upp;
```

```
struct MyAppWindow : TopWindow
{
...
}
```

Hello JoseB

The compiler reports "GetDefaultPrinterA" has not been declared.

However "winspool.h" is included.

So it seems:

- either "winspool.h" is not accessible by the compiler
  - or "GetDefaultPrinterA" is not included in "winspool.h". In this case tell me your MinGW version. Perhaps it would be outdated.
-

Version 2901...

May it be a UPP bug?

Hello JoseB

Quote:- either "winspool.h" is not accessible by the compiler  
- or "GetDefaultPrinterA" is not included in "winspool.h". In this case tell me your MinGW version. Perhaps it would be outdated.

Please first search in your MinGW include files if "winspool.h" is there.

Hello JoseB

Please check:

- Is "c:\upp\mingw\include" in Setup/Build Methods/MINGW/Include Directories menu?
- Does "c:\upp\mingw\include\winpool.h" contains GetDefaultPrinterA?

---

---

Yes, it is in the menu. See img in attachment.

In the c:\upp\mingw\include\winpool.h i have the entries in img in attachment (for you to see line numbers)

Hello JoseB

I do not know what to answer you .

- You have XP or newer windows
- You have "c:\upp\mingw\include\winpool.h"
- And you have in your source:  
`#include "c:\upp\mingw\include\winpool.h"`  
or  
`#include <winpool.h>`

I do not understand the compiler error:

C:\upp\MyApps\kk\main.cpp:21: error: 'GetDefaultPrinterA' was not declared in this scope

If you want, open a "TeamViewer" session for me to see in my browser your Desktop. It is like VNC but simple to install and immune to firewalls and proxies.

Can you tell me a email of you to send you the team viewer credentials? (gmail one to GTalk if necessary?)

(imoveisnacionais@gmail.com)

Can we schedule the operating 1 hour later? Here it is 13:33. Can we make that at 14:30h?

JoseB
