Subject: Feature request: DropGrid shifts to edit text mode if dynamic search results in 0 matches
Posted by alendar on Tue, 21 Dec 2010 01:38:55 GMT

Hi,

I love GridCtrl and DropGrid, they are fantastic products. Would it be possible to enhance DropGrid to enact a StartEdit against the Value attribute if the dynamic match comes up with 0 matches?

This would be similar to the behavior of a Microsoft ComboListBox function.

I looked through the code but it's over my head. Somehow the value attribute in DropGrid has be related to an edit field. Is it displayed in the GridPopUpHeader::Paint?

Perhaps a function could be added to DropGrid, "DropGrid &EditOnNoMatch(bool b = true)".

If not, I'll just use the AddPlus().

Thanks,
Al

Great you found gridctrl useful As for your suggestion it's a bit complicated in current code but I'll see what I can do. Maybe it's not so hard to implement.
