Subject: How to maximize printing area of the RichEdit Ctrl? [SOLVED]
Posted by JoseB on Sun, 09 Jan 2011 15:58:28 GMT

Hi all

I am using:

Size page = Size(3968, 6074);

(If i change these values nothing happens)

like in all UPP samples. When I use the document ruler and adjust margins to zero (ruler pointer to the minimum at left and maximum at right) the document on print has always a left margin on about 2cm and at right about 2,5 cm.

How to configure the RichEdit ctrl to have a ruler that starts at 0 printer coordinates to the maximum of A4 paper sheet?

If not possible, how to decrease these "standard margins"?

Thanks a lot.

JoseB

I am using:

Size page = Size(3968, 6074);

(If i change these values nothing happens)

Change how?

Using RichEdit::SetPage, something should happen.

BTW, that above value is sort of compromise as each printer has different printable area.

My mistake. Sorry.
I was changing the printing area but forgetting the editor area. Now it works

Thanks

JoseB
