Thanks for notice.

There was some weird activity in launchpad builds today, namely 4 builds in last 24 hours out of which first 3 were corrupted and failed. I assume it was caused just by you starting up/tunning the infrastructure. The last build was successful, so from my point of view everything is probably back to normal now.

Honza

Yes, I hope so.

There were some nasty surprises, but everything should be back to normal now.

Plus we have redmine
