Hello all

Cookie Prize 2011 is announced.

This year all U++ Forum users can vote. You as user can vote to two different candidates (only one vote per candidate).

Send your votes through a PM here until March 25th, 24:00 UTC.

Prize not yet decided but this year it will be open to a wider audience .

Great idea, I couldn't decide between two persons so this naturally solves my dilemma

Honza

Hey!, we have a tie.

We need more votes.

Hello all

After a close poll, this year winner is Honza (dolik.rce)

Congratulations!

To avoid any cultural or health issue, the final prize has been agreed with the winner .

Congratulations Honza.

I'm new to this concept and would like to know more on how it works. Are the contributors / runners up listed someplace? Forgive my naive questions. Honestly, I do not know.

Thanks to everyone who voted for me. I'm not really sure why, though

There should be a little change to the rules next year... Something along the lines that same person shall not win twice, or at least not twice in row. IMHO there was many people who would deserve the prize more than I did

Jerson: There were no restrictions as to who you can choose, if you wanted you could even vote for someone who never heard about U++ But I guess everyone just voted for someone active on this forum.

Best regards,
Honza

Honza, I'm sure you deserve the prize. However, my question was and still is more elementary. A little more detail on what's involved and how the cookie awards work will help. I myself did not

vote since I did not know what factors to consider while I cast votes. The link to the cookie prize page does not really explain things clearly. So, my questions.

I know I am exposing my U++ newbie roots here, but, I guess I'd better be embarrassed for not knowing than remain like that forever.

Thanks, Cheers

Hello all

For Jerson:
Quote:Cookie prize rewards yearly an U++ project contributor who have distinguished for her/his involvement. S/He has been helpful to the community kindly answering questions, supporting the newbies and giving good new ideas.

In addition s/he have gone further and have got into action launching her/his ideas. Because of it s/he have spent many hours of her/his time offering her/his colleagues useful new tools.

For Honza:
Quote:There should be a little change to the rules next year... Something along the lines that same person shall not win twice, or at least not twice in rowYou are right. It will be added for next year.
