It is a little late, but I will be.

I intend to integrate v8 javascript into u++.

Sorry for the short time. I expect these months to be active, so we will have more meetings.

Anyway, we will post tomorrow a summary of the meeting.

Looks like I will not make it too

But if there is really the increased activity you predict in close future, I will surely get a chance to express my opinions next time.

Looking forward to the logs or summary,
Honza

Hello all

No log for the meeting (problems with Slashnet, it is not compatible with Firefox 4). If somebody has it s/he can upload it.

We talked about GSoC. I will include the state of art in the other post, as at the same time of the meeting I was talking with the GSoC Globus admin and gave us good advices.

Other issue we talked is about U++ as a library. .icpp files, INITBLOCKs and things like that.

Finally we could not talk about TheIDE.
