Hello,

I'm not sure to well understand what you mean...

Maybe it's something similar to what just happened to me ? See dolik.rce's answer

I cant see the list of templates here:
 http://www.ultimatepp.org/app$ide$GettingStarted$en-us.html_ 1.png
It is empty.

Probably it would be better if somebody knowing well upp answers...

Did you try to click on "Basic CtrlLib application", "Core Project" or "CtrlLib application with main window" ? Seems normal that with "empty" you get no template... I have the same !

It is empty.
Hi Wlad,

Can you check if there are any *.upt files in you U++ sources? There should be e.g.
uppsrc/Core/Core.upt. I checked the lucid package and they seem to be present there, so if theyre
missing on your system there is probably some other problem.

If the *.upt are at their places, than there must be some problem that prevent theide from
seeing/reading them.

Honza

Can you give more explanations (or link to documentation...) about this, please ?

I don't understand why we should find something with "empty" template ! For me, I have the same
as Wlad (but I have something with others choices as I told in my previous post) and always
thought that it's normal...

For me, I have .upt files :
~ $ find /usr/share/upp/uppsrc/ -name *.upt -print
/usr/share/upp/uppsrc/Core/core.upt
/usr/share/upp/uppsrc/Core/sub.upt
/usr/share/upp/uppsrc/CtrlLib/Complex.upt
/usr/share/upp/uppsrc/CtrlLib/Normal.upt
~ $ find /home/joseph/upp/uppsrc/ -name *.upt -print
/home/joseph/upp/uppsrc/Core/core.upt
/home/joseph/upp/uppsrc/Core/sub.upt
/home/joseph/upp/uppsrc/CtrlLib/Normal.upt
/home/joseph/upp/uppsrc/CtrlLib/Complex.upt

Project" or "CtrlLib application with main window" ? Seems normal that with "empty" you get no
template... I have the same !
Was it a joke?
I repeat: they do not exist in the list of project templates.

I guess jibe just misunderstood what do you refer to by empty  Especially since the picture you linked showed situation where the template list actually wasn't empty... Stuff like this happens on forums where many people talking many different languages meet

Anyway, have you tried to look for the .upt files as I suggested? They contain the atemplates, so knowing if they are present is the first step to figure out why this problem happened and how to solve it.

Hi,

dolik.rce wrote on Mon, 07 March 2011 23:02I guess jibe just misunderstood what do you refer to by empty
Probably... And obviously I still don't understand

Sorry, Wlad : I didn't expect to be shocking... Just tried to help not thinking that I was totally misunderstanding what is your problem.
