Subject: No links on functions/widgets lists

Hi,

On several functions or widgets lists pages, like CtrlLib widgets, there is no links to the pages with detailed expanations... Not easy to find something in the documentation, especially for beginners.

Adding these links will make the documentation a lot more easy to use and usefull, and I'm sure that a lot of people will think that it's more complete, as for now, they don't find what they are looking for...
