Just click on "Download" and then "win32 installer" and choose the latest .exe. When that is downloaded just run it.

When installing follow the the instruction for installing the compiler, MSC9, MSC10 or MinGW.

Upp works good with Win XP, Vista and W7 as well as Linux.

Upp is a great project but lacking in Help docs.
The forum is very good for getting help.

Neil

Hello typhoong

I think your doubts come from in page http://www.ultimatepp.org/appideinstall$en-us.html it talks about Windows 7.

Do not worry. As that page says, the downloads include:
- Windows 7 Headers and Libs (do not worry about "Vista" here - this options contains Win98/2000/XP headers too).
- x86 C++ Compiler (you might want to install x64 compiler too)
- Windows SDK Utilities for Win32

Do not worry. As that page says, the downloads include:
- Windows 7 Headers and Libs (do not worry about "Vista" here - this options contains Win98/2000/XP headers too).
- x86 C++ Compiler (you might want to install x64 compiler too)
- Windows SDK Utilities for Win32

Does it work with the new Windows 8 SDK?

http://msdn.microsoft.com/en-us/windows/desktop/hh852363.asp x

EDIT: It looks like the page says it doesn't include VC++ compiler. So it won't work.
