Subject: Printing without dialog
Posted by Mindtraveller on Sun, 22 May 2011 22:41:23 GMT

I want to print some graphics in "silent" mode using default printer under Windows. Is it possible to do it without showing Printer Dialog in U++? If yes, please tell what could be the easiest way. If not, please tell which functions to start looking at?
Thanks in forward!

Simply use PrinterJob WITHOUT using Execute.
