Hello All,

After installing ubuntu 11.04 I have an issue:
Quote:
/usr/include/glib-2.0/glib/gtypes.h:34:24: error: glibconfig.h: No such file or directory

I resolved this by adding in inlcudes setting the address:

/usr/lib/i386-linux-gnu/glib-2.0/include

I hope this will be useful.

For x64 its:

/usr/lib/x86_64-linux-gnu/glib-2.0/include

Update it under build methods include directories.

They moved it in 2.0.
