Hi,

Web browsers send a HTTP\_ACCEPT\_LANGUAGE header so that you can obtain the page in your own language. I should like to have the same when I get some page with HttpClient. Is it possible ? How can I do ?

I tried to add  
client.AddHeaders("Accept-Language: fr-fr, fr, en");  
before calling  
content = client.ExecuteRedirect();  
but it freezes on the ExecuteRedirect()...

Is there some doc or example that could help me ?

I tried to add  
client.AddHeaders("Accept-Language: fr-fr, fr, en");

Try this:

```
client.AddHeaders("Accept-Language: fr-fr, fr, en\r\n");
```

Hi,

Yes, it works !

---

... So, it was that simple ! Sorry that I did not think about that ! Thanks a lot
