
Subject: C2143 Error on even simple window with just one label? Help? What happened?

Posted by [silverx](#) on Wed, 29 Jun 2011 14:09:43 GMT

[View Forum Message](#) <> [Reply to Message](#)

I started getting an error message, so I went back and just created a SimpleWindow, program, did a clean, and I still get the error, when I try and change the label to something else in the code. This has worked before.

I have attached the program as well. Any clue as how I can get this back working again? I get an error on the SimpleWindow.lblA = "abc"; line.

Here is the compile information:

this->lblA = "abc"; ?

"SimpleWindow" inside SimpleWindow::SimpleWindow() function has no meaning, it's just name of class, and there's no such variable instance at that point.

Subject: Re: C2143 Error on even simple window with just one label? Help? What happened?

I added a button, and then did the SimpleWindow.lblA = "abc"; and I get the error again.

Attached is the changes, and I still get the error message.

silverx wrote on Wed, 29 June 2011 16:36I added a button, and then did the SimpleWindow.lblA = "abc"; and I get the error again.

Attached is the changes, and I still get the error message.

Just use

```
lblA ="abc";  
or  
lblA.SetText("abc");
```

without SimpleWindow. in front of control.

Regards,
Luigi
