The attached file is imported correctly before r3579 commit, and *very* badly after this commit.

CtrlCore/ParseRTF.cpp, EncodeRTF.cpp: table & cell border fixes

Ciao

Hi,

For my usage Qtf -> Rtf, the patch corrected some bugs (colour of text inside tables and after tables).

So the bug seems to be on the rtf parser side

Hello!

Sorry for the bug; I believe the biggest problem was a newly introduced bug in the table processing mechanism which caused removal of the first table column. I hope I've fixed this together with previous omission of cell margin width handling. I still haven't found out how to correctly import the left table margin and cell background colors.

Regards

Tomas
