Subject: Another RTF import bug -- Tables again

Here another bug a customer pointed out; tables are wrongly imported, even with latest svn.
I've added 2 images and the rtf file; here the bad behaviour :

Here the correct one (from libreoffice writer import) :

As you can see, the FIRST row is imported correctly; next ones get additional empty columns.
The attached RTF contains (among other...) the table.

Ciao

Max

Here an oversimplified part of same rtf; it has a table with just 3 rows; first of them gets imported correctly, second and third gets additional empty columns.
The file is imported correctly in libreoffice/openoffice.

Here bad behaviour :

And here the good one :

Ciao

Hi there!

I hope I've managed to fix your latest bug; it's on SVN, please check it out.

Regards

Tomas

Hi Tom

It seems all ok.... even better than Libreoffice importer

Ciao

Max
