Subject: Found solution. On arrayctrl, you have addcolumn, but what about deleting a column

NEVER MIND I FOUND THE RESET AND THAT SEEMS TO WORK.

I want to delete some columns from a control array and their is a addcolumn, but I don't find any delete or remove column.

I have found how to delete a row, delete all of the data in the array, but no way to delete a column. Or even delete all of the columns and start over with adding in the columns I want.

Is their a way to delete a column or delete all of the information in an arrayctrl, not just hide it? By this I want to get rid of the header items and restart with new headers as well for columns.
