Is there a way to block indent and dedent??

If not maybe add that ability under Assist the same as done with block comment/uncomment:
[{("/" enclose selection

"+" would indent and "-" would dedent.

Tab and Shift+Tab works on selection.
If you want full indent, try to use code formatting tool (not sure what/how, I use the Tab only and WFM)

THANKS!!

I must have missed that in the Help/Manual.
A few times I pulled code into Eclipse just to format the indentation.
