Hi,

I'd like to check out the latest upp sources with UVS2 since it seems that the svn repository is not uptodate at any time.
My problem is that I don't know, which ftp server to set for communication.

Is there a tutorial or manual on UVS2 somewhere.

Matthias

I'm having trouble getting UVS setup and running properly... Are there any FAQ's, HowTo's, readme's, manuals? I looked at the stuff I downloaded with the source, and it doesn't get me far.

At this point I've got it point to the repository and I think I have it set up incorrectly. A short HoTo Get Started would be helpful.

Thanks to luzr I'm sorted out on the setup...

suggestion -- copy /upp/readme to /upp/Uvs2/readme

Next question -- There are "prepared" download configurations for uppsrc, reference, and examples. Should I also set something up for Common and tutorial? One of the last times I downloaded everything they were not included.

  Thanks and best regards,
