
Subject: Suggestion about Execute command

It is true that the Execute command do have a shortcut, but I think it would be better if it were included in the toolbar just to the side of Compile button, or somewhere in the toolbar. Also, make the toolbar customizable if possible.

If I knew to do it, I would do it. But I'm just starting over again reading books. Also, I don't know how to work with GUI yet.

Please let know your action to this suggestion. Do or not. Thank you. =)
