Hi friends,

I have developed a GUI which contains schema file and multiple .cpp files...
I usually get an error only on second compilation and afterwards..
I know its a problem in header file but how to sort out this....

The error is.....

```
/Test1.sch:55:multiple definition of `TABLE_INFO_1(Upp::SqlSchema&)'  
$blitz.o:/root/upp/MyApps/Test/Test1.sch:3: first defined here  
.  
.  
./Test1.sch:55: multiple definition of `TABLE_R_FACEGRID(Upp::SqlSchema&)'  
/$blitz.o:/root/upp/MyApps/Test/Test1.sch:55: first defined here  
.  
.  
.  
.  
.  
.  
.  
.  
.  
.
```

This runs multiple lines....

With regards
Mahanthesh

Thanks Mirek..
It Worked..
